3202 S Custer Ln, Spokane, WA, US

*Recently graduated, adaptive Software Engineer with a strong foundation in full-stack development, cloud deployment, and collaborative problem-solving. Proven experience writing clean, maintainable code in C#, Python, JavaScript, and SQL, as well as working with RESTful APIs, CI/CD, and AWS. A clear communicator and dependable team player who excels at following instructions, feedback, and executing. Quick to learn and ready to contribute.*

## Work Experience

### Brewery Technician

No Li Brewhouse / Spokane, WA  
Aug 2018 - Nov 2023

Operated equipment to package products. Followed company SOPs and maintained quality standards. Utilized Google Workspace. Increased product yields by 28%.

## Education

### Western Governors University

Master of Science Software Engineering  
April 2026

## Project Experience

### Microservices Architecture & Modernization | Python, RESTful APIs, Docker, System Design

- Refactored a monolithic Python application into scalable microservices, designing RESTful APIs to improve application modularity, maintainability, and code structure.

### Cloud Application Deployment & Automation | Amazon Web Services, Technical Documentation

- Deployed cloud applications leveraging AWS, configuring resources and application monitoring.
- Authored technical documentation covering deployment workflows and system architecture; awarded multiple WGU Academic Excellence Awards for course work.

### Automated CI/CD Pipeline Engineering | GitLab, CI/CD, PowerShell, Test Automation

- Designed and configured CI/CD pipelines to streamline code validation, automated testing, and deployment.

### Student Course Management Platform | C# .NET MAUI, SQLite

- Developed an Android mobile application using C#.
- Architected the backend using SQLite, implementing stored procedures, triggers, and data validation.

## Core Skills

- **Languages & Web:** C#, Java (familiar), Python, SQL, JavaScript, HTML5, CSS3, RESTful APIs
- **Cloud & DevOps:** Amazon Web Services (AWS), AWS Cloud Deployment, Terraform, Infrastructure as Code (IaC), CI/CD Pipelines, Git / GitHub, Version Control, PowerShell, Automation Scripting, Containerization (Docker), Orchestration (Kubernetes)
- **Database Engineering:** Stored Procedures, Triggers, Data Validation, Query Optimization
- **Methodologies & Frameworks:** Agile / Scrum / Kanban, Software Development Lifecycle (SDLC), Object-Oriented Programming (OOP), Systems Thinking, Code Reviews, Technical Documentation
- **Reliability, Testing & Operations:** Software Reliability Engineering (SRE) Concepts, Application KPI Tracking, Application Monitoring, Process Automation, Test Automation, QA Validation, Regression & Functional Testing, Production Troubleshooting & Support
