Davis Harsh

Software Engineer
Spokane, WA | 206.643.0703 | davisharsh@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Software Engineer (M.S.) with project experience in C# and .NET MAUI, Python, SQL, RESTful APIs, and CI/CD. Experienced in refactoring a monolithic application into microservices, automating testing and deployment, debugging and resolving GitLab tickets, and documenting systems. Familiar with Agile/Scrum with Git-based workflows. Detail-oriented and quick to learn, and eager to build software for utilities and energy infrastructure under the mentorship of experienced engineers.

CORE SKILLS

Languages & Frameworks: C#, .NET MAUI, Python, SQL, RESTful APIs, Object-Oriented Programming (OOP)

Development Tools & CI/CD: Git, CI/CD Pipelines, Automation Scripting, Version Control, Code Reviews

Testing & Quality: Unit Testing, Integration Testing, Test Automation, Regression & Functional Testing, QA Validation, Production Troubleshooting & Support

Cloud & Containers: Amazon Web Services (AWS), Docker, Terraform, Infrastructure as Code (IaC), Kubernetes

Databases: SQLite, MS SQL Server, Stored Procedures, Triggers, Data Validation, Query Optimization

Methodologies: Agile / Scrum / Kanban, Software Development Lifecycle (SDLC), Technical Documentation, Systems Thinking

PROJECT EXPERIENCE

Student Course Management Platform *C#, .NET MAUI, SQLite*

- Developed an Android mobile application in C# with a SQLite backend, implementing stored procedures, triggers, and data validation.

Microservices Architecture & Modernization *Python, RESTful APIs, System Design, Unit Testing, Integration Testing*

- Refactored a monolithic Python application into scalable microservices, designing RESTful APIs to improve modularity, maintainability, and code structure.
- Used Claude to draft and debug code, then reviewed and tested all output before committing.
- Designed unit and integration tests to ensure program functionality.

Automated CI/CD Pipeline Engineering *GitLab, CI/CD, Test Automation*

- Designed and configured CI/CD pipelines to automate code validation, automated testing, and deployment.
- Debugged and resolved GitLab tickets.

Cloud Application Deployment & Automation *Amazon Web Services, Technical Documentation*

- Deployed a cloud application on AWS, configuring resources and application monitoring.
- Authored technical documentation covering deployment workflows and system architecture.

EDUCATION & CERTIFICATIONS

Master of Science, Software Engineering | Western Governors University *Apr 2026*

Multiple WGU Academic Excellence Awards for coursework
Certifications: AWS Certified Cloud Practitioner; ITIL 4 Foundation

WORK EXPERIENCE

Brewery Technician | No-Li Brewhouse, Spokane, WA *Aug 2018 – Nov 2023*

- Troubleshot canning equipment and followed company SOPs and quality standards.
- Increased product yields by 28%.
