

DAVIS HARSH

3202 S Custer Ln, Spokane, WA 99223 | 206.643.0703

davis.harsh@gmail.com | [GitHub](#) | [LinkedIn](#)

Recently graduated Software Engineer with a strong foundation in full-stack development, DevOps practices, and problem-solving. Proven experience writing clean, maintainable code in C#, Python, and SQL, as well as working with JavaScript, RESTful APIs, CI/CD, and AWS. A clear communicator and dependable team player who excels at following instructions, listening to feedback, and executing. Quick to learn and ready to contribute.

EDUCATION

Western Governors University

Master of Science – Software Engineering

April 2026

PROJECT EXPERIENCE

Microservices Architecture & Modernization | Python, RESTful APIs, Selenium

- Refactored a monolithic Python application into scalable microservices, using RESTful APIs to improve application modularity, maintainability, and code structure.
- Used Selenium for application test cases.

Cloud Web App Deployment & Automation | Python, Amazon Web Services, Kubernetes, Docker

- Deployed a web app leveraging AWS, configuring resources and application monitoring.
- Authored technical documentation covering deployment workflows and system architecture; awarded multiple WGU Academic Excellence Awards for course work.

Student Academic Course Management Application | C#, .NET MAUI, SQLite, Encryption, SDLC Documentation

- Developed an Android application using C#.
- Architected the backend using SQLite, implementing stored procedures, triggers, and data validation.
- Implemented SHA256 encryption to login system.

WORK HISTORY

Brewery Technician

No Li Brewhouse | Spokane, WA

08/2018 – 11/2023

Operated equipment to package products. Collaborated with multiple teams, followed company SOPs and maintained quality standards. Utilized Google Workspace. Increased product yields by 28%.
