DAVIS HARSH

Software Engineer
3202 S Custer Ln, Spokane, WA 99223 | 206.643.0703
davis.harsh@gmail.com | GitHub | LinkedIn

Software Engineer with a strong foundation in full-stack development, DevOps, and problem-solving. Proven experience writing clean, maintainable code in C#, Python, and SQL, as well as working with CI/CD, RESTful APIs, and AWS. A clear communicator and dependable team player that is quick to learn and ready to contribute.

EDUCATION

Western Governors University
Master of Science – Software Engineering
April 2026

PROJECT EXPERIENCE

Microservices Architecture & Modernization| Python, RESTful APIs, Selenium

Refactored a monolithic Python application into scalable microservices using RESTful APIs to improve application modularity, maintainability, and code structure. Used Selenium for application test cases.

Cloud Web App Deployment & Automation | Python, Amazon Web Services, Kubernetes, Docker

Deployed a web app leveraging AWS, configuring EKS, ECS, EC2, S3, and Secrets Manager. Authored technical documentation covering deployment workflows and system architecture; awarded multiple WGU Academic Excellence Awards for course work.

Student Academic Course Management Application | C#, .NET MAUI, SQLite, Encryption, SDLC Documentation

Developed an Android application with C# utilizing SQLite in the backend. Implemented stored procedures, triggers, data validation, and SHA256 encryption to login system. Designed UI and handled user flow with asynchronous navigation.

WORK HISTORY

Brewery Technician
No Li Brewhouse | Spokane, WA 08/2018 – 11/2023
Operated equipment to package products. Collaborated with multiple teams, followed company SOPs and maintained quality standards. Utilized Google Workspace. Increased product yields by 28%.

SKILLS

Communication, troubleshooting, problem-solving, C#, Python, Git, Continuous Integration Continuous Delivery (CI/CD), DevOps, Amazon Web Services (AWS), object-oriented programming (OOP), performance testing, regression testing, functional testing, test automation, quality assurance (QA), JavaScript, TypeScript, Agile, Software Development Lifecycle (SDLC), Systems Thinking, Code Reviews, Technical Documentation, Software Reliability Engineering (SRE) Concepts, Key Performance Indicator (KPI) tracking, pipelines, AWS Cloud Practitioner certification, ITIL 4 Foundations certification.
